Impartiality Statement

ISO/IEC 17024:2012 Clause 4.4.2 — Certified Innovation Professional Level 1: Associate (CIP-1)

The Global Innovation Management Institute (GIMI) ensures that its operations safeguard objectivity and impartiality in delivering its certification programs in a fair and non-discriminatory manner.

GIMI policies and procedures are designed to be non-discriminatory and are administered with fairness and equity. GIMI makes its certification programs available to all applicants who meet the publicly available criteria for certification. Certification is not conditional upon membership in any association, group, or organization. However, certification eligibility may be restricted where there is an unacceptable risk to GIMI's integrity, such as evidence of fraudulent behavior, concealment of information, or provision of false information during the application or assessment process.

All GIMI personnel, contractors, and volunteers involved in the certification process:

- Act objectively and are free from undue commercial, financial, or other pressures that could compromise impartiality.
- Have an ongoing obligation to disclose potential conflicts of interest and ensure that they are appropriately managed.

GIMI does not offer or endorse any products or services affiliated with the certification program that could impact its impartiality. The institute does not suggest or imply that certification would be simpler, easier, faster, or more affordable if any specific person or consultancy were engaged.

GIMI actively monitors compliance with this Impartiality Statement through the administration of its Management System, including rigorous processes to identify and manage risks to impartiality. By adhering to these principles, GIMI is dedicated to upholding the credibility and objectivity of its certification programs.

OFFICIAL DECLARATION

This Impartiality Statement constitutes an official declaration by the Global Innovation Management Institute, Inc. (GIMI), issued by GIMI Top Management on behalf of the organization. It is published without restriction in conformity with ISO/IEC 17024:2012 Clause 4.4.2.

Issued by: Chief Executive Officer, Global Innovation Management Institute, Inc.

On behalf of GIMI Top Management
